

# Hall-effect Current Sensors, Split-core Transducers and More

Split-core current transformers, transducers and current detecting modules

VTs and CTs for electronic watt-hours meters, and power and energy monitoring devices

Ground-fault current sensor, zero-phase current transformers and Rogowski coils

Hall-effect voltage and current sensors, and DC leakage current sensors

We're an exclusive exporter of high-precision current sensors, the core components used in the power instrument industry. If you need customizations, we have the capabilities to cater to your requirements accurately and promptly.

All standard products are mostly available off the shelf in our inventory facility so that we can offer you fast service. And for other items that need to be developed from scratch, we can have orders ready within one week. For more information, contact us today and we'll respond with a quote within 24 hours.

#### Product range:

- Split-core current transducers
- Split-core current transformers
- Split-core current detecting modules
- VTs and CTs for power and energy monitoring devices
- ZCTs (zero phase CT)
- Hall-effect voltage sensors
- Hall-effect current sensors
- DC-tolerance CTs
- Rogowski coil for meter devices
- Clamp-on CTs
