

Your key to power and energy measurement solutions

Split-core current transformers and transducers for energy metering and automation

New split-core flexible rogowski coil and transducers for energy metering and SCADA, PLC

VTs and CTs for electronic watt-hour meters, and power and energy monitoring devices

Hall-effect voltage and current sensors and DC leakage current sensors

We are an exclusive designer, manufacturer and worldwide exporter of high-precision current sensors – the core components of the power and energy instrument industry. In addition to our standard product line, we are also capable of designing and manufacturing custom products based on your technical specifications promptly, accurately and innovatively.

All standard components are usually available off-the-shelf. And we can process small standard product orders and ship them within one week. For more information, contact us today and we'll respond with a quote within 24 hours.

Our product range includes:

- Split-core current transducers
- Split-core current transformers
- Split-core current detecting modules
- Split-core flexible rogowski coil CT
- VTs and CTs for power and energy monitoring devices
- Hall-effect voltage sensors
- Hall-effect current sensors
- DC-tolerance CTs
- Rogowski coil for meter devices
- Clamp-on CTs
- Zero phase CTs (ZCTs)
